Skills

Programming	Java (Spring, Spring Boot) JavaScript (Angular, Express) Python (Django)
DevOps & Cloud	CI/CD AWS GCP Terraform Terragrunt Kubernetes Docker Jenkins GitHub Actions Prometheus Grafana
Databases	SQL(Oracle, MariaDB, PostgreSQL) NoSQL(MongoDB, Redis).
Complements	APIs (REST, SOAP, GraphQL) Kafka Testing(JUnit, Unittest) SOLID, DRY, KISS, YAGNI Clean Code.

Experience

Freelance	Remote
Java Developer	Jun 2026 - Present
- Performed adjustments and maintenance on the backend of an e-commerce platform developed with Java and Spring Boot. - Maintained authentication solutions in Spring Boot, from custom implementations to Keycloak integrations.	
Asmet Salud EPS	Popayán, Cauca
DevOps Engineer	Jan 2025 - Mar 2026
- Implemented CI/CD pipelines with Jenkins and GitLab for deploying Spring Boot microservices on AWS using EKS. - Managed on-premises Kubernetes clusters in production Spring Boot microservices, monitored with Prometheus and Grafana. - Provisioned and maintained AWS infrastructure using Terraform and Terragrunt, including EKS, IAM, Secrets Manager, and RDS. - Collaborated with development teams using GitLab, Jira, and Agile methodologies.	
IT Infrastructure Professional	Jun 2024 - Dec 2024
- Developed a password management system with high availability (HA) and a disaster recovery plan (DRP). - Managed AWS and on-premises infrastructure, Active Directory, networks, backups, and database backups. - Migrated JBoss and WebLogic applications from Java 7 to Java 11, including servers and code.	

Education

Universidad del Cauca	Popayán, Cauca
Systems Engineering (Expected graduation: Dec 2026)	Sep 2019 - Present
Relevant Courses: Artificial Intelligence, Statistics (Machine Learning oriented), Data Structures, Databases, Distributed Systems, and Numerical Analysis.	
Universidad Colegio Mayor del Cauca	Popayán, Cauca
Academic Training in English Language Knowledge and Occupational Skills	Jan 2016 - Feb 2019

Projects

Finanzas Plus	Popayán, Cauca
Universidad del Cauca	Feb 2024 - Jun 2024
- Developed an API to facilitate access to budget information at Universidad del Cauca. - Designed the architecture and developed the backend using Spring Boot and Oracle, ensuring performance and scalability. - Implemented the Oracle database and integrated the solution with existing systems. Technical Skills: Spring Boot, Hexagonal Architecture, REST APIs, Oracle, JUnit, GitHub, Scrum	

Certifications

AWS Certified Cloud Practitioner	Amazon Web Services
Online	Expected Oct 2026
Unlocking Information Security	edX
IsraelIX	Oct 2020
- Knowledge of information security terminology, vulnerabilities, and exploits, with a focus on detailed analysis. - Analysis of critical vulnerabilities, common variants, and mitigation techniques.	

Achievements

2023	Honorable Mention for developing (TutorIA), TADHack Global	Colombia
